***Terminal Disclaimer***

1. The terminal disclaimer filed on January 25, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,704,018 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Allowable Subject Matter***

2. Claims 26-49 are allowed.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a graphic computing method, among other things, comprising

executing at least one of *arithmetic operations of vertex displacement, coordinate conversion, coloring, and shading* using various programs *in units of vertexes of subpolygons* of the subpolygon mesh *to obtain parameters* required for drawing;

computing drawing data *in units of pixels on the basis of the parameters* and picture data for texture mapping;

reading at least the picture data for texture mapping *corresponding to each vertex of the subpolygon mesh* from the frame memory via the frame memory readout route;

and computing *the parameters required for drawing in units of pixels* of the subpolygons for each vertex of the subpolygon meshes using the read data.

The closest prior art, Oka et al. (U.S. Patent No. 6,157,384) teach dividing the a three dimensional surface of an object into subpolygon mesh, performing texture mapping to the

divided subpolygons through a texture cache which reads out texture data from the frame memory.

However, reference Oka et al. does not teach the above mentioned features.

### *Conclusion*
